Environmental Health Zoominar Series

“Joint Effects of Air Pollution and Social Factors on Cardiovascular Health”

Christina Hemphill Fuller, ScD
Associate Professor
School of Public Health
Georgia State University

Date
Wed., Sept. 15, 2021

Time
12:00 - 1:00 pm

Location
Virtual via Zoom

Register
by Sept. 13, 2021

Dr. Fuller works in the field of air quality exposure assessment and environmental epidemiology. Her research interests include outdoor air pollution, the effects of air pollution on respiratory and cardiovascular health, community-engaged research, urban health and environmental justice. She was a co-investigator with the Environmental Health Core of the School of Public Health’s Center of Excellence for Health Disparities Research (CoEx). Currently, she is examining the joint effects of air pollution and social factors on cardiovascular health as a JPB Environmental Health Fellow.
