Environmental Health Zoominar Series

“Health Effects of Metal Exposure: Implementing Longitudinal Epidemiologic Studies among Diverse Participant Populations”

Maria Argos, PhD
Associate Professor
School of Public Health
University of Illinois Chicago

Date
Wed., Oct. 6, 2021

Time
12:00 - 1:00 pm

Location
Virtual via Zoom

Register
by Oct. 4, 2021

Dr. Argos’ research focuses on environmental and molecular epidemiology of chronic diseases, with particular emphasis on the health effects of metal exposures. Her research has a strong emphasis on identifying molecular pathways altered by environmental exposures that influence disease risk, by leveraging high-dimensional molecular data and biomarker data obtained from biological specimens collected in the epidemiological setting. She has extensive experience implementing longitudinal epidemiologic studies among diverse participant populations in the US and internationally.
